***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: The present invention relates to a radio frequency amplifiers. More particularly, the present invention relates to feedback for radio frequency amplifiers which enhances dynamic output level control, efficiency and linearity of the radio frequency power amplifier.

The prior art of record in combination or alone fails to teach or suggest these elements of independent claim 1 in combination with other elements. For example independent claim 1 has claim limitations such as an adaptive feedback channel coupled between the input and output of the RF power amplifier, the adaptive feedback channel receiving as inputs audio signals for modulation of the input RF power amplifier, a frequency command word indicative of desired frequency and phase of the RF power amplifier system, and a control word indicative of desired power level of the output of the RF power amplifier, and of a mode of operation of RF amplifier system, wherein in response to the inputs the adaptive feedback channel provides as an output a degenerative feedback signal to the input of the RF power amplifier. For the above reasons independent claim 1 and its dependent claims 2-13 are allowed.

2. Claims 1-13 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
